Lunch and refreshments are provided

Course Outline: The IOSH Managing Safely training course is a widely recognised accredited course for managers and supervisors and is suitable across a broad range of sectors and industries. It is designed to give managers all they need to know to help them handle health and safety in their workplace at a practical level.

The programme covers all main health and safety issues, and includes a session tackling the environment too. It includes an assessment at the end of the course and also a practical work based project, to ensure learning objectives can be practically applied. Successful completion of these two elements is necessary for a 'pass certificate' to be issued.

The IOSH Managing Safely training course is run over four days and has eight modules as follows:

- Introducing Managing Safely
- Controlling risks
- Assessing risks
- Investigating accidents & incidents
- An understanding of health, safety & environmental management systems & their business benefits
- Protecting our environment
- Measuring performance
- Identifying Hazards
- Understanding your responsibilities
- The practical ability to manage health & safety issues in the workplace
- A basic understanding of common hazards including; fire, electricity, working at height, stress, noise, vibration, chemicals & workplace transport
