

ProAktive Risk Management

Providing practical advice and hands-on support for effective risk management

Every business faces risk on a daily basis and our suite of services aim to deliver you with bespoke solutions to manage and reduce these where possible.

ProAktive Risk Management services are:

Health and Safety

We believe that the key to “effective health and safety”, is to work together with clients, ensuring that we maximise the time we spend with you to effectively implement the systems and procedures.

Fleet Risk Management

Companies are exposed to risk each time their vehicles are on the road. We can work with you to minimise this risk via; driver licence checks, driver assessments, fleet risk assessment, driver handbooks/vehicle assignment agreements, driver information records, vehicle check records, claims trend analysis.

Business Continuity Planning

Through effective risk analysis and contingency planning our business continuity planning helps protect your business from potential disaster.

Our ProAktive Information Portal (PiP) puts live monitoring and control of all of these systems at your fingertips, with no investment in technology required.
